

METHOD AND APPARATUS FOR RECORDING HITS WHILE SPARRING

Abstract

An apparatus and method to record hits to a contestant engaged in sparring with another contestant is disclosed. This includes a first item of clothing having at least one first electrically conductive strip and at least one second electrically conductive strip, wherein the at least one first electrically conductive strip is adjacent to the at least one second electrically conductive strip, a voltage receiving mechanism, having a first lead and a second lead, wherein the first lead is electrically connected to the at least one first electrically conductive strip and the second lead is electrically connected to the at least one second electrically conductive strip, a second item of clothing, having at least one electrically conductive portion, which can electrically connect the at least one first electrically conductive strip and the at least one second electrically conductive strip of the first item of clothing when placed in contact.
